

# Summer School in Immuno-Oncology

10-12 June 2019 | Hellenic Pasteur Institute | Athens, Greece

*scientific program*

Organiser  
The Hellenic Society of  
Immuno-Oncology

For more information  
please visit the website

# Summer School *in* Immuno-Oncology

## MONDAY JUNE 10

### IMMUNOTHERAPIES

|             |                                                                                                     |                              |
|-------------|-----------------------------------------------------------------------------------------------------|------------------------------|
| 09.00–09.40 | Translating old discoveries into tomorrow's cancer immunotherapy                                    | <b>E. M. Inderberg (NO)</b>  |
| 09.40–10.20 | T-cell therapy- bringing discovery into the clinic                                                  | <b>G. Kvalheim (NO)</b>      |
| 10.20–11.00 | <i>Coffee Break</i>                                                                                 |                              |
| 11.00–11.40 | TCR structure and function – Clinical trials                                                        | <b>M. Nishimura (USA)</b>    |
| 11.40–12.20 | Tumor ablation and immune stimulation                                                               | <b>G. Adema (NL)</b>         |
| 12.20–13.00 | Targeting xCT in metastatic breast cancer treatment.                                                | <b>F. Cavallo (IT)</b>       |
| 13.00–15.00 | <i>Light lunch</i>                                                                                  |                              |
| 14.30–15.10 | NSCLC: updated data with ICIs                                                                       | <b>I. Mountzios (GR)</b>     |
| 15.10–15.50 | Immunotherapy for the treatment of urothelial cancer                                                | <b>N. Pistalmatzian (GR)</b> |
| 15.50–16.30 | Immunotherapy beyond anti-PD1/PDL1                                                                  | <b>M. Tsiatas (GR)</b>       |
|             | <i>Getting together</i>                                                                             |                              |
| 16.30–18.30 | The students meet the experts in small parallel groups and discuss aspects from their presentations |                              |

## TUESDAY JUNE 11

### IMMUNE SUPPRESSION-RESISTANCE-IMMUNE CHECKPOINTS

|             |                                                                                            |                                   |
|-------------|--------------------------------------------------------------------------------------------|-----------------------------------|
| 09.00–09.40 | T-cell suppression by cancer cells; off the beaten track                                   | <b>P.T. Straten (DK)</b>          |
| 09.40–10.20 | The role of Myeloid-derived suppressor cells in tumor immune evasion                       | <b>V. Bronte (IT)</b>             |
| 10.20–11.00 | <i>Coffee Break</i>                                                                        |                                   |
| 11.00–11.40 | Modulation of immune responses via PD-L1 targeting                                         | <b>S. Ostrand-Rosenberg (USA)</b> |
| 11.40–12.20 | Immune escape and resistances to immune check point inhibitors                             | <b>B. Seliger (DE)</b>            |
| 12.20–13.00 | Ageing and the human immune system in the era of cancer immunotherapy: is it all downhill? | <b>G. Pawelec (DE)</b>            |

# Summer School *in* Immuno-Oncology

13.00-15.00 **Light lunch**

14.30-15.10 The Melanoma paradigm for anti-cancer immunotherapy

**D. Bafaloukos (GR)**

15.10-15.50 Immune biomarkers

**A. Koutsopoulos (GR)**

15.50-16.30 Mechanisms of immune resistance

**C.N. Baxevanis (GR)**

## *Getting together*

16.30-18.30 The students meet the experts in small parallel groups and discuss aspects from their presentations

## WEDNESDAY JUNE 12

### T CELL RECEPTOR SPECIFICITIES

09.00-09.40 The (tremendous) gap between the epitopes predicted, and those actually recognized by CD8 T cells

**P. Lehmann (USA)**

09.40-10.20 Unrelated stem cell donors for the treatment of haematological malignancies.

**A. Madrigal (UK)**

10.20-11.00 **Coffee Break**

11.00-11.40 T-cell monitoring for clinical studies: main techniques, pitfalls, and quality assurance

**C. Gouttefangeas (DE)**

12.00-13.30 **Light Lunch**

13.30-14.10 Immune check point inhibitors for the treatment of the head and neck cancer

**A. Argiris (GR)**

14.10-14.50 Management of immune related toxicity

**A. Koumarianou (GR)**

## *Getting together*

15.00-17.00 The students meet the experts in small parallel groups and discuss aspects from their presentations
